SonicWall & CODA Intelligence: Elevating Vulnerability Management

Keep your services running securely and affordably 24/7

Overview

As small and medium-sized businesses (SMBs) advance in their digital transformations, they face an expanded attack surface that leaves them more vulnerable to rising cybersecurity threats. For managed service providers (MSPs), addressing these vulnerabilities amid complex compliance and regulatory demands requires advanced, efficient tools to bridge critical security skill gaps.

SonicWall has partnered with CODA Intelligence to offer a comprehensive vulnerability management service that empowers MSPs and SMBs to detect, analyze, and respond to cyber risks so our partners can maintain robust security postures across multiple environments. Footprint is CODA Intelligence's next-generation vulnerability management platform designed to help organizations identify, prioritize, and resolve security vulnerabilities across complex IT environments. By combining SonicWall's solutions, services, and expertise with CODA's cutting-edge technology, we offer partners a seamless, highly effective defense ecosystem.

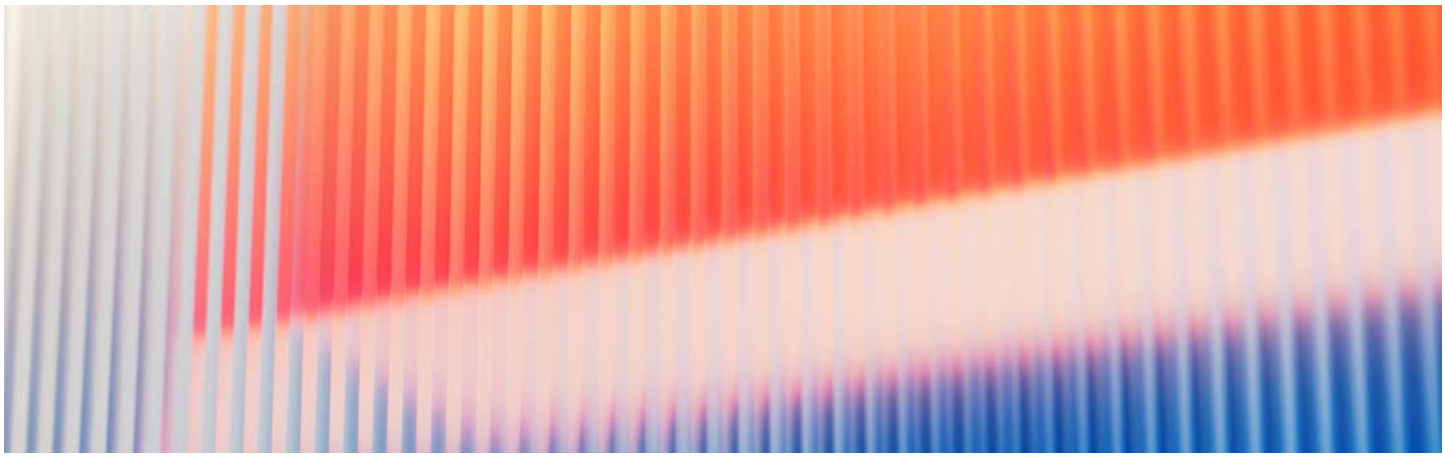
Benefits

- **Scalable Vulnerability Management Across Clients:** Monitor and manage vulnerabilities for multiple clients from a single platform
- **Full Attack Surface Visibility:** Leverage AI-powered vulnerability prioritization to focus your team's limited time on the most critical risks
- **MSP-Friendly Console:** Dedicated MSP console for easy management and streamlined operations
- **Streamlined Compliance Support for Clients:** Assist clients in meeting regulator requirement, providing regular compliance reports, and staying audit-ready
- **Automation for Increased Operational Efficiency:** With automated scanning, reporting, and remediation workflows, streamline your processes to manage more clients with more overhead
- **Gain New Revenue Streams:** Unlock new revenue streams by integrating Footprint into your managed services portfolio
- **Grow Your Customer Base:** Access new customers with built-in marketing capabilities and automated presales

Key Features

- Contextual Risk Scoring
- Scan Target Automated Discovery
- Automatic Reporting
- Real-Time Alerting
- Remediation Prioritization
- Historical and Postured Attack Surface View
- External and Internal Scanning

USE CASES	
PROACTIVE VULNERABILITY MANAGEMENT	MSPs can proactively provide vulnerability management services for clients by continuously identifying, tracking, and mitigating security vulnerabilities before it becomes a bigger problem.
AUTOMATED PATCH MANAGEMENT AND REMEDIATION	Perform patch management for customers with minimal manual intervention.
COMPREHENSIVE REPORTING AND INSIGHTS FOR CUSTOMERS	Provide customers with regular updates on their security posture using detailed reporting and analytics.
INCIDENT RESPONSE AND SOC EFFICIENCY	Provide insights that speed up response times, enabling your own in-house SOC or one you partner with to address the most significant risks with precision.



About SonicWall

SonicWall is a cybersecurity forerunner with more than 30 years of expertise and a relentless focus on its partners. With the ability to build, scale and manage security across the cloud, hybrid and traditional environments in real time, SonicWall can quickly and economically provide purpose-built security solutions to any organization around the world. Based on data from its own threat research center, SonicWall delivers seamless protection against the most evasive cyberattacks and supplies actionable threat intelligence to partners, customers and the cybersecurity community.
