

SONICWALL®

Turkish Poultry Producer Bupiliç Has Trusted SonicWall for 20 Years

See how SonicWall has enhanced Bupiliç's security and significantly reduced access control issues.

Business Need

Bupiliç is a large poultry producer in Turkey with over 1,000 employees and 200 contracted breeding henhouses in various regions across Turkey. The innovative chicken company was founded in 2004 as the result of a merger and the resulting company, Bupiliç, keeps quality and ethics top-of-mind in everything it does. Working with so many employees and henhouses means that Bupiliç must have excellent, centralized cybersecurity to keep things operating smoothly. The integrated industrial facility has trusted SonicWall with its cybersecurity from the very beginning.

Solution

To ensure smooth operations and the safety of its networks, Bupiliç has deployed NS*a* 2700 in High Availability mode. This setup has not only given the poultry company peace of mind, but has also allowed for seamless connections and communication between Bupiliç and its many contracted henhouses.

Results

Bupiliç has structured all of their firewall services on the principles of zero trust and manages all of their cybersecurity through SonicWall. Using SonicWall, the company's network structure is more secure and they've had no access control problems.

Benefits

- Enhanced security
- Zero access control issues

Solutions at a glance

- NS*a* 2700

"During my 13 years as a manager at the company, I have only worked with SonicWall security solutions. We like the structure and brand in terms of security management."
