

SONICWALL®

Mi-WiFi Improves Security and Customer Experience with SonicWall

Mi-WiFi has been using a variety of SonicWall solutions to help protect its clients for nearly 15 years now.

Business Need

Mi-WiFi is a South African company that offers software to authenticate users for internet access in various environments, including corporate offices, educational institutions, healthcare facilities, event venues and more. The company's goal is to streamline the process of verifying and managing user access while maintaining high standards of security as well as ensuring a positive user experience. It's also important to the company that its solution works seamlessly with the environments of its partnered organizations. When working to build a unique guest network authentication solution for hotels, restaurants and others, Mi-WiFi wanted to make cybersecurity a top priority while still ensuring that guests were able to connect to the network with little effort.

Solution

Mi-WiFi searched for a solution to its cybersecurity needs and ultimately chose to turn to SonicWall. The company enabled secure wifi by integrating a SonicWall Clean Wireless solution into its flagship offering as well as deploying SonicWall NGFWs. SonicWall's solutions addressed Mi-WiFi's foremost concern which was to bolster its security framework. The company knew that its software could pose risks to the establishment by allowing guests to connect to their wifi and also knew that cyber threats are constantly evolving. SonicWall's solutions offered the robust protection required to secure Mi-WiFi's guest authentication processes and safeguard its clients from cyber threats.

Results

SonicWall helped address Mi-WiFi's critical need for enhanced cybersecurity, operational efficiency, scalability and improved client satisfaction, which greatly contributed to the companies growth as well its industries evolving needs. SonicWall helped Mi-WiFi provide a reliable and secure authentication experience for its clients and helped Mi-WiFi separate itself from competitors by offering a better security, reliability and performance. The partnership with SonicWall also allowed Mi-WiFi to give its reseller partners more opportunities.

Benefits

- Better security and more network control
- Customers can take advantage of branding to grow revenue
- SonicWall's in-depth reporting allows for better statistic collecting
- Mi-WiFi can give its reseller partners more opportunities

Solutions at a glance

- SonicWall Clean Wireless Solution
- SonicWall Next-Generation Firewalls
- SonicPoint Wireless Access Points

"We were tired of seeing how access to the Internet was being provided without a second thought to security. We had a strong relationship with SonicWall and we decided to use what SonicWall could offer."
